65. What are you doing in your province that is successful?

Personal appeals of trans patients to MB health to have vaginoplasty, phalloplasty and metoidioplasty publicly funded have been successful. Building capacity for transgender primary care and linking those care providers in a network is just beginning.

66. What are the next steps in expanding accessible competent trans health care in your province?

We need to expand our capacity amongst GPs to assess for and prescribe hormone therapy. We need to expand our capacity amongst mental health care providers to assess for and recommend SRS. We need to improve our capacity for trans specific mental health support services, especially as related to the gender transition journey.
